1. System Overview

The NCNW Winston-Salem Section website consists of two connected systems:

A. WordPress Website

The main public-facing website is built using WordPress and hosted through Hostinger.

The WordPress portion includes:

- Home page
- About Us page
- Programs page
- Events Calendar
- Contact Us page

- Navigation menus
- Member accounts
- Executive Board access restrictions

B. Flask Application System

A separate Flask application handles:

- Membership applications
- Membership approval workflow
- Admin dashboard
- Active member management

This Flask application is deployed separately through Render and linked to the WordPress website.

2. Website Access & Login Information

Hostinger Account

Hostinger manages:

- Website hosting

- Domain management
- SSL certificate
- Email setup
- File management
- Databases

IMPORTANT:

The Hostinger account should be maintained by organizational leadership.

WordPress Admin Access

WordPress admin allows administrators to:

- Edit pages
- Update images
- Manage menus
- Add users
- Manage plugins
- Approve access levels

Typical login URL:

/wp-admin

Example:

<https://winstonsalemncnw.org/wp-admin>

Flask Admin Dashboard

The Flask admin dashboard allows executive members to:

- Review applications
- Approve applicants
- Manage active members

This dashboard is hosted separately through Render.

3. WordPress Website Management

Logging Into WordPress

This section explains how administrators can safely access the WordPress website dashboard.

Step 1 — Open the Login Page

1. Open a web browser such as:

- Google Chrome
 - Microsoft Edge
 - Safari
2. Click into the address bar at the very top of the browser window.
 3. Type the website login address:
<https://yourdomain.org/wp-admin>
 4. Press the Enter or Return key on the keyboard.
-

Step 2 — Enter Login Information

After the page loads, the WordPress login screen should appear.

The login screen contains:

- Username or Email Address field
 - Password field
 - Blue “Log In” button
5. Click inside the Username or Email Address field.
 6. Enter the administrator username or administrator email address.
 7. Click inside the Password field.
 8. Enter the password.

IMPORTANT:

Passwords are case-sensitive. Capital letters and lowercase letters matter.

9. Click the blue “Log In” button located underneath the password field.
-

Step 3 — Verify Successful Login

After logging in successfully, the WordPress Dashboard will appear.

Expected Result:

A black navigation menu should appear on the left side of the screen.

This menu contains important website management tools including:

- Pages
 - Media
 - Plugins
 - Appearance
 - Users
 - Events
 - WPForms
-

Troubleshooting Login Problems

If the login page does not appear:

- verify the website address was typed correctly
- confirm internet access is working
- refresh the browser page

If the password is forgotten:

1. Click the “Lost your password?” link underneath the login form.
2. Follow the password reset instructions.
3. Check the administrator email inbox for the reset email.

IMPORTANT:

Only authorized administrators should have access to the WordPress dashboard.

Understanding the WordPress Dashboard

After logging in, the dashboard acts as the main control center for the website.

The dashboard menu is located on the LEFT side of the screen inside a black vertical sidebar.

Most website management tasks begin from this menu.

Important Dashboard Sections

Pages

Purpose:

Used to edit and manage website pages.

Examples:

- Home
- About Us
- Programs
- Contact Us
- Events Calendar

To access Pages:

1. Locate “Pages” on the left sidebar.
2. Click Pages.
3. A full list of website pages will appear.

Appearance

Purpose:

Controls the overall visual appearance of the website.

Used for:

- navigation menus
- theme customization
- header settings
- layout changes

To access Appearance:

1. Locate “Appearance” on the left sidebar.
2. Click Appearance.

Additional options such as Menus and Customize will appear underneath.

Plugins

Purpose:

Controls additional website functionality.

Plugins are tools that add features to the website.

Examples of website plugins include:

- event calendars
- forms
- member systems
- sliders
- backups
- migration tools

To access Plugins:

1. Locate “Plugins” on the left sidebar.
2. Click Plugins.
3. The Installed Plugins screen will appear.

From this screen administrators can:

- activate plugins
- deactivate plugins
- update plugins
- access plugin settings

IMPORTANT:

Do NOT deactivate or delete plugins unless you understand what they control.

Disabling certain plugins may cause:

- login systems to stop working

- forms to disappear
- events to stop displaying
- member-only pages to fail

Managing Website Plugins

This screen displays the **Plugins** section in WordPress, where administrators can manage the tools and features installed on the website.

Plugins are used to add extra functionality to the site, such as:

- Member account management
- Event calendars
- Forms and applications
- Content restrictions

- Website backups and migration tools
- Sliders and visual features

From this page, administrators can:

- Activate plugins
- Deactivate plugins
- Access plugin settings
- Update plugins when available
- Remove unused plugins

Some important plugins currently used on the website include:

- **Ultimate Member** – Handles member accounts and login features
- **Members** – Controls user roles and permissions
- **The Events Calendar** – Manages website events and calendars
- **WPForms** – Creates forms and applications
- **Smart Slider 3** – Controls homepage sliders and visual banners

Important Note:

Do not deactivate or delete plugins unless you understand their purpose. Disabling certain plugins may cause parts of the website to stop working properly, including login systems, forms, events, or restricted member pages.

Users

Purpose:

Controls website user accounts and permissions.

Used for:

- adding members
- resetting passwords
- assigning roles
- managing executive access

To access Users:

1. Locate “Users” on the left sidebar.
2. Click Users.

The All Users screen will appear.

This page displays:

- usernames
- email addresses
- assigned roles
- account status

Events

Purpose:

Controls the website calendar and organization events.

Used for:

- creating events
- editing events
- updating event dates
- displaying upcoming activities

To access Events:

1. Locate “Events” on the left sidebar.
2. Click Events.

Additional event management options will appear underneath.

Creating a New Event

This screen is used to create and publish a new event using **The Events Calendar** plugin in WordPress.

To create an event:

1. Enter the **event title** at the top of the page.
2. Add event details and information in the main text editor area.
3. Set the **event date and time** in the “Time & Date” section.
4. Add any event categories or tags if needed.
5. Review the event settings on the right-hand side.
6. Click the **“Publish”** button to make the event live on the website calendar.

The event will automatically appear on the Events page and calendar once published.

Important Note:

Use the “**Preview**” button before publishing if you would like to review how the event will appear to visitors on the website.

4. Editing Website Pages

How to Edit a Page

1. From the left dashboard menu, click:
Pages
 2. Hover over the page you want to edit.
 3. Click Edit.
 4. Click directly into any text block to begin editing.
 5. Make the desired changes.
 6. To save changes:
Click the blue Update button in the top-right corner.
-

How to Add Images to a Page

1. Edit the desired page.
2. Click the image block.
3. Select Replace.
4. Choose:
 - Media Library

OR

 - Upload
5. Select the image.
6. Click Replace.
7. Click Update to save changes.

The screenshot shows a WordPress admin interface for editing a page titled "Our Chapter President". The page content includes two images of a woman. A block selection menu is open, showing options like Paragraph, Image, Heading, Gallery, List, and Quote. The "Image" block is selected. The interface also shows a "Custom Fields" section and a "Content Permissions (Members)" section.

Adding a New Block to a Page

This screen shows how to add new content blocks while editing a page in WordPress. After clicking the “+” (**Add Block**) button, users can choose different types of content such as paragraphs, images, headings, galleries, lists, and quotes.

Commonly used blocks include:

- **Paragraph** – Add normal text content
- **Image** – Upload or insert pictures
- **Heading** – Create section titles
- **Gallery** – Display multiple images together
- **List** – Add bullet points or numbered lists

Use the search bar to quickly find a specific block type if needed.

Important Note:

After making changes to the page, click the “**Save**” button in the top-right corner to keep all updates.

How to Remove Images

1. Click the image.

2. Press Delete/Backspace.
 3. Click Update.
-

How to Add Buttons

1. Edit the page.
 2. Click the + icon.
 3. Search for:
Button
 4. Add the button block.
 5. Enter button text.
 6. Paste desired link into the URL field.
 7. Click Update.
-

Common Pages

Home

Main landing page.

About Us

Organization history and mission.

Programs

Program descriptions and initiatives.

Events Calendar

Displays organization events.

Contact Us

Contains contact form and organization information.

5. Managing Navigation Menus

How to Reorder Navigation Tabs

1. In the dashboard menu, go to:
Appearance → Menus
2. Select the active menu.
3. Click and drag menu items into the desired order.

Example:

- Home
- About Us
- Programs
- Events
- Members Only
- Contact Us

4. Click Save Menu.

5. Refresh the website to verify changes.

How to Add a New Page to the Navigation

1. Open:

Appearance → Menus

2. On the left side, locate the page.

3. Check the box beside the page.

4. Click Add to Menu.

5. Drag it into the desired position.

6. Click Save Menu.

How to Create Dropdown Menus

1. Drag a menu item slightly underneath another item.
2. The item will indent.
3. Save the menu.

This creates a dropdown/submenu.

Important Note

Menu positioning may also depend on:

- Header image size
- Theme settings
- OnePress customization settings

If the menu appears incorrectly:

- Verify the correct header image is being used
 - Verify the OnePress theme is active
-

6. Updating Images

Replacing Images

1. Edit the desired page.
 2. Click the image.
 3. Select Replace.
 4. Choose:
 - Upload
 - OR
 - Media Library
 5. Save/Update page.
-

Important Image Notes

If images appear missing after migration:

- Verify uploads transferred correctly
- Verify the correct theme is active
- Verify media files exist in the uploads folder

7. Membership Application System

Membership Application Workflow

The membership system works in the following order:

1. Applicant completes the application form.
2. Applicant submits the form.
3. Applicant is redirected to the Zelle payment page.
4. Applicant scans the QR code and submits payment.
5. Application appears inside the Admin Dashboard.
6. Executive Board reviews application.
7. Applicant is approved.
8. Approved member appears in the Active Members page.

How to Access the Admin Dashboard

1. Open the Flask admin URL.
2. Log in if required.

3. Review submitted applications.

Executive Board

[View Applications Dashboard](#)

[Active Members Dashboard](#)

Reminders

Verify Zelle payments before approving members.

Member Process Instructions

- 1. Verify Application**
 - Review the application details in the Admin Dashboard
- 2. Verify Zelle Payment**
 - Confirm payment has been received via zelle
- 3. Create Member**
 - Add the member into the system

NCNW
Winston-Salem Section

Applications Dashboard

Name	Email	Membership	Status	Payment
chris henry	shenry1000@gmail.com	Annual	Pending	Mark Paid
Chris Henry	chrishenry@gmail.com	Annual	Pending	Mark Paid
Trenadi Johnson	tjohnson@gmail.com	Life	Paid	✓ Paid
joe doe	schoolinfo2ch@gmail.com	Annual	Paid	✓ Paid
james fries	jfries@gmail.com	Annual	Paid	✓ Paid

How to Approve Applications

1. Open the Admin Dashboard.
 2. Locate the applicant.
 3. Verify Zelle payment.
 4. Click the approval/payment button.
 5. Applicant automatically transfers into Active Members.
-

How to Remove Members

1. Open the Active Members Dashboard.
2. Locate the applicant.
3. Click Remove.

This removes the application from the database.

NCNW Winston-Salem Section			
Active Members			
Name	Email	Membership	Action
James Fries	jfries@gmail.com	Annual	Remove
Joe Doe	schoolinfo2cch@gmail.com	Annual	Remove
Trenadi Johnson	tjohnson@gmail.com	Life	Remove

Zelle Payment Confirmation

After application submission:

- A QR code appears
- Applicant scans code using mobile device
- Payment is submitted through Zelle

8. Membership Approval Workflow

Reviewing Applications

Executive Board members can:

- Review pending applications
 - Approve applicants
 - Remove invalid submissions
-

Approval Process

Once approved:

- Applicant moves into Active Members section
 - Member information becomes part of organization records
-

9. Managing WordPress Users & Roles

User Roles

Administrator

Full website control.

Executive Board

Restricted administrative access.

Member

Basic member access.

Adding New Users

1. Go to:

Users → Add New

2. Enter:

- Username
- Email
- Password
- Role

3. Click Add New User.

Managing Website Users and Member Accounts

This screen displays the **Users** section in WordPress, where administrators can manage member accounts and website access permissions.

From this page, administrators can:

- View all registered users and members
- Edit user account information
- Assign or remove user roles
- Approve or deactivate member accounts
- Send password reset or activation emails

- Search and filter users by status or role

Each user account includes information such as:

- Username
- Full Name
- Email Address
- Assigned Role(s)
- Account Status

Common roles may include:

- **Administrator** – Full website access and control
- **Executive Board** – Access to executive-only content and features
- **Member** – Standard member access

The screenshot shows the WordPress admin interface with the 'Users' list. The sidebar on the left has the 'Users' menu item highlighted. The main content area shows a table of users with the following data:

Username	Name	Email	Roles	Posts	Status
WortAure	Aurelia Worthy	iamree@bellsouth.net	Administrator, Executive Board, Member	0	Approved
WillJudy	Judy Williams	jwwillia@juno.com	Member	0	Approved Put as pending Send activation email Deactivate
WillJacq	Jacqueline Williams	jwuralhall@aol.com	Member	0	Approved
WillJann	Jannie Williams	jrwssu@juno.com	Member	0	Approved
WoodPhyl	Phyllis Wilkins-Woodruff	upendotres@gmail.com	Member	0	Approved
ThomAiri	Airis Thomas	airdanae89@gmail.com	Administrator, Executive Board, Member	0	Approved
TankJudi	Judith Tanksley	jdavscreshaw@gmail.com	Member	0	Approved
SuttLind	Linda Sutton	ljutton2000@hotmail.com	Member	0	Approved
SmitLisa	Lisa Smith	lisawill10@aol.com	Member	0	Approved
SmitCass	Cassius Smith	cassius91@gmail.com	Member	0	Approved
ShepLizz	Lizzie Shepard	lizzie.shepard15@gmail.com	Member	0	Approved

Important Note:

Be careful when changing user roles or deleting accounts, as this can affect a member's ability to log into the website or access restricted pages.

Password Notes

Passwords can be:

- manually assigned
 - reset later
 - updated by users
-

10. Contact Forms & Notifications

WPForms

The Contact Us page uses WPForms.

Users can submit:

- Name
 - Email
 - Subject
 - Message
-

Notifications

Form notifications are emailed to administrators.

IMPORTANT:

WPForms Lite does NOT permanently store entries inside WordPress.

Notifications are handled through email.

11. Hostinger Hosting Management

Logging Into Hostinger

1. Go to:
<https://hostinger.com>
 2. Click Log In.
 3. Enter the Hostinger account credentials.
 4. Open the Hosting Dashboard.
-

What Hostinger Controls

Hostinger manages:

- domain
 - website hosting
 - SSL certificate
 - backups
 - website files
 - professional email accounts
-

Important Hostinger Areas

File Manager

Used for:

- uploading files
- theme troubleshooting
- media recovery

Domains

Used to:

- renew domain
- manage DNS

Emails

Used to:

- create professional email addresses
 - manage mailboxes
-

12. Flask Application Overview

Flask Components

The Flask system contains:

- app.py
 - templates
 - static folder
 - database
-

Flask Routes

Important routes include:

- /application
 - /admin
 - /members
-

Local Development

To run Flask locally:

Open terminal in project folder.

Run:

```
python app.py
```

OR

```
python3 app.py
```

Then open:

<http://127.0.0.1:5000>

13. Render Deployment Overview

Why Render Is Used

The Flask application cannot permanently stay online from a personal computer.

Render is used to:

- keep the Flask app online 24/7
- host the application publicly
- provide permanent URLs for:
 - application page
 - admin dashboard
 - active members page

Important Flask URLs

Examples:

- /application
- /admin
- /members

These URLs are linked into the WordPress website buttons.

How to Restart the Flask App in Render

1. Log into Render.
2. Open the Web Service.
3. Click Manual Deploy.
4. Click Restart Service.

Wait for deployment to finish.

Important Render Notes

Free Render plans may:

- spin down during inactivity
 - take time to wake back up
-

14. Troubleshooting Guide

Problem: Missing Images

Possible causes:

- incomplete migration
- missing uploads
- incorrect theme activation

Solutions:

- reactivate correct theme
 - reupload media
 - verify uploads folder
-

Problem: Theme Missing

Example message:

"The theme directory 'onepress' does not exist"

Solution:

- reinstall OnePress theme
 - activate OnePress theme
-

Problem: Navigation Looks Incorrect

Possible causes:

- incorrect header image size
 - menu settings
 - theme customization settings
-

Problem: Flask Links Not Working

Possible causes:

- Flask not running locally
 - Render deployment inactive
 - incorrect URLs
-

Problem: Import Freezes During Migration

Potential fixes:

- reduce export size
 - remove unnecessary cache
 - remove spam comments
 - retry export
 - use alternative migration methods
-

15. Important Maintenance Notes

Always Keep Backups

Before major changes:

- export backup

- save important media
 - document credentials
-

Recommended Ongoing Maintenance

Monthly:

- update plugins
 - review forms
 - test application flow
 - review backups
-

16. Emergency Recovery Information

If WordPress Stops Working

1. Contact Hostinger support
2. Restore latest backup
3. Verify domain settings
4. Verify theme activation

If Flask App Stops Working

1. Check Render dashboard
 2. Restart Render service
 3. Verify deployment logs
 4. Verify app.py configuration
-

Final Notes

This system was designed to:

- simplify organization management
- improve member communication
- modernize membership processing
- provide long-term scalability for the NCNW Winston-Salem Section

Future updates may include:

- enhanced member dashboards
- improved payment integrations
- expanded automation

- cloud storage integration
- advanced reporting systems

End of Manual
